

Correlation of Negative Granularity (Music) and RH Area 45

Figure 10. Study 2 scatter plot showing positive correlation between right hemisphere Area 45 (pars triangularis) cortical thickness and negative emotional granularity in response to music, $r(48) = .28$, $p = .047$.

Figure 11. Right pars triangularis (BA44) (green) and pars opercularis (BA45) (magenta) from Destrieux atlas parcellation.
